DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The underlined portions of independent claims 1 and 15 concerning specially formatted ^{base} paper have not clearly explained in the specification.

Regarding claim 1, a position sensor for detecting a position of the electronic reading device on a specially formatted paper based on a predefined address pattern of the specially formatted paper; and

a printer for printing on the specially formatted paper based on the detected position of the electronic reading device.

Regarding claim 15, a method for generating output with an electronic reading device, comprising the steps of:

determining a position where an electronic output reading device is located on a specially formatted surface based on a detection of a predefined address pattern of the specially formatted surface; and

generating output based on the detected position of the electronic output reading device.
